1 Narratives and Literary Hypertext: Reading and writing fluid Hypertext Narratives

Polle T. Zellweger, Anne Mangen, Paula Newman
June 2002 **Proceedings of the thirteenth ACM conference on Hypertext and hypermedia**
Publisher: ACM Press

Full text available: pdf(417.30 KB) Additional Information: full citation, abstract, references, citings, index terms, review

We describe a new way to present and author hypertext narratives. The Fluid Reader constructs a unified interactive text from the content of multiple nodes and allows a reader to explore alternative paths within it. The Fluid Reader has been available as a hands-on museum exhibit for nearly a year to date, where it has been enjoyed by readers of all ages. Its success has prompted further interest and development in Fluid hypertexts. We have designed and implemented an authoring tool called the F ...

Keywords: authoring, fluid documents, fluid hypertext, fluid reader, fluid writer, hypertext narrative, stretchtext, treetable, visualization

2 Composable ad hoc location-based services for heterogeneous mobile clients

Todd D. Hodes, Randy H. Katz
October 1999 **Wireless Networks**, Volume 5 Issue 5
Publisher: Kluwer Academic Publishers

Full text available: pdf(403.18 KB) Additional Information: full citation, references, citings, index terms

3 Design expo: The stakeholder forest: designing an expenses application for the enterprise

Jonathan Arnowitz, Monica Heidelberg, Diana Gray, Michael Arent, Naomi Dorsch
April 2005 **CHI '05 extended abstracts on Human factors in computing systems**
Publisher: ACM Press

Full text available: pdf(1.29 MB) Additional Information: full citation, abstract, references

This paper discusses the redesign of PeopleSoft's Enterprise Expenses product from a product that was notorious for it's complexity into a product that was both usable and one of PeopleSoft's best selling products. The process used was a combination of best

practices from user-centered design, business and marketing to deliver a usable application on a pure-html "no-code on the client" platform. The design effort was also a collaboration of design, usability engineers, business strategy, functio ...

Keywords: business software, case study, design expo, travel and expense software, user experience, user-centered design

4 Model-driven development of Web applications: the AutoWeb system

Piero Fraternali, Paolo Paolini
October 2000 **ACM Transactions on Information Systems (TOIS)**, Volume 18 Issue 4
Publisher: ACM Press

Full text available: pdf(6.94 MB) Additional Information: full citation, abstract, references, citings, index terms

This paper describes a methodology for the development of WWW applications and a tool environment specifically tailored for the methodology. The methodology and the development environment are based upon models and techniques already used in the hypermedia, information systems, and software engineering fields, adapted and blended in an original mix. The foundation of the proposal is the conceptual design of WWW applications, using HDM-lite, a notation for the specification of structure, nav ...

Keywords: HTML, WWW, application, development, intranet, modeling

5 Automated categorization in the international patent classification

C. J. Fall, A. Törcsvári, K. Benzineb, G. Karetka
April 2003 **ACM SIGIR Forum**, Volume 37 Issue 1
Publisher: ACM Press

Full text available: pdf(1.32 MB) Additional Information: full citation, abstract, references, index terms, review

A new reference collection of patent documents for training and testing automated categorization systems is established and described in detail. This collection is tailored for automating the attribution of international patent classification codes to patent applications and is made publicly available for future research work. We report the results of applying a variety of machine learning algorithms to the automated categorization of English-language patent documents. This procedure involves a ...

Keywords: IPC taxonomy, automated categorization, patent, support vector machines

6 Seeing the whole in parts: text summarization for web browsing on handheld devices

Orkut Buyukkokten, Hector Garcia-Molina, Andreas Paepcke
April 2001 **Proceedings of the 10th international conference on World Wide Web**
Publisher: ACM Press

Full text available: pdf(1.48 MB) Additional Information: full citation, references, citings, index terms

Keywords: PDA, WAP, handheld computers, mobile computing, personal digital assistant, summarization, ubiquitous computing, wireless computing

7 Query Processing: Towards a visual query interface for phylogenetic databases

Hasan M. Jamil, Giovanni A. Modica, Maria A. Teran

October 2001 **Proceedings of the tenth international conference on Information and knowledge management**
Publisher: ACM Press

Full text available: pdf(3.74 MB) Additional Information: full citation, abstract, references, citings, index terms

Querying and visualization of phylogenetic databases remain a great challenge due to their complex tree type semi structured nature. Naturally, successful phylogenetic databases such as the *Tree of Life* database at the University of Arizona are implemented as Web documents in HTML. While Web implementation of such databases facilitate the representation, and in part, visualization of their contents, querying remains an issue. The interoperability of Web-based phylogenetic databases with o ...

Keywords: information retrieval, phylogenies, query language, relational database, tree and semi structured data, visualization, web

8 Comprehension through evolution: A system for visualizing and analyzing the evolution of the web with a time series of graphs
Masashi Toyoda, Masaru Kitsuregawa
September 2005 **Proceedings of the sixteenth ACM conference on Hypertext and hypermedia HYPERTEXT '05**
Publisher: ACM Press
Full text available: pdf(939.15 KB) Additional Information: full citation, abstract, references, index terms

We propose WebRelievo, a system for visualizing and analyzing the evolution of the web structure based on a large Web archive with a series of snapshots. It visualizes the evolution with a time series of graphs, in which nodes are web pages, and edges are relationships between pages. Graphs can be clustered to show the overview of changes in graphs. WebRelievo aligns these graphs according to their time, and automatically determines their layout keeping positions of nodes synchronized over time, ...

Keywords: Web graph, evolution, link analysis, link spamming, visualization

9 The Desert environment
Steven P. Reiss
October 1999 **ACM Transactions on Software Engineering and Methodology (TOSEM)**, Volume 8 Issue 4
Publisher: ACM Press

Full text available: pdf(868.64 KB) Additional Information: full citation, abstract, references, citings, index terms, review

The Desert software engineering environment is a suite of tools developed to enhance programmer productivity through increased tool integration. It introduces an inexpensive form of data integration to provide additional tool capabilities and information sharing among tools, uses a common editor to give high-quality semantic feedback and to integrate different types of software artifacts, and builds virtual files on demand to address specific tasks. All this is done in an open and extensibl ...

Keywords: integrated programming environments, program editors

10 Versions and standards of HTML
Dennis J. Bouvier
October 1995 **ACM SIGAPP Applied Computing Review**, Volume 3 Issue 2
Publisher: ACM Press

Full text available: pdf(520.41 KB) Additional Information: full citation, abstract, index terms

In the brief history of the World Wide Web (WWW), much has changed. Millions of web pages have been published in a relatively short time. Next to the Web content, the one of the most dynamic aspects of the WWW is the development of HyperText Markup Language (HTML). This paper explores the various versions of HTML and gives a status report on HTML standards development. A discussion of possible future trends is also included.

Keywords: HTML, WWW, hyper text, markup

11 Data mountain: using spatial memory for document management

George Robertson, Mary Czerwinski, Kevin Larson, Daniel C. Robbins, David Thiel, Maarten van Dantzich

November 1998 **Proceedings of the 11th annual ACM symposium on User interface software and technology**

Publisher: ACM Press

Full text available: pdf(1.78 MB) Additional Information: full citation, references, citings, index terms

Keywords: 3D user interfaces, desktop VR, document mangement, information visualization, spatial cognition, spatial memory

12 Digital libraries in the classroom: The interactive shared educational environment: user interface, system architecture and field study

Xiangming Mu, Gary Marchionini, Amy Pattee

May 2003 **Proceedings of the 3rd ACM/IEEE-CS joint conference on Digital libraries**

Publisher: IEEE Computer Society

Full text available: pdf(298.58 KB) Additional Information: full citation, abstract, references, index terms

The user interface and system architecture of a novel Interactive Shared Educational Environment (ISEE) are presented. Based on a lightweight infrastructure, ISEE enables relatively low bandwidth network users to share videos as well as text messages. Smartlink is a new concept introduced in this paper. Individual information presentation components, like the video player and text chat room, are "smartly" linked together through video timestamps and hyperlinks. A field study related to children ...

13 Annotations: Advene: active reading through hypervideo

Olivier Aubert, Yannick Prié

September 2005 **Proceedings of the sixteenth ACM conference on Hypertext and hypermedia HYPERTEXT '05**

Publisher: ACM Press

Full text available: pdf(665.67 KB) Additional Information: full citation, abstract, references, index terms

Active reading and hypermedia usage are an integral part of scholar daily practices, but the full exploitation of their potentialities still lies far ahead. In the search for new methods and tools, we focus in this article on the use of audiovisual material in a scholar context. One of the results of active reading applied to audiovisual material can be hypervideos, that we define as views on audiovisual documents associated with an annotation structure. The notion of hypervideo is useful to ana ...

Keywords: advene, annotation, audiovisual information visualisation, document template, hypervideo, sharing, time and synchronisation

14 Special issue on ICML: Coupled clustering: a method for detecting structural correspondence

Zvika Marx, Ido Dagan, Joachim M. Buhmann, Eli Shamir
March 2003 **The Journal of Machine Learning Research**, Volume 3
Publisher: MIT Press
Full text available: pdf(967.15 KB) Additional Information: full citation, abstract, citings, index terms

This paper proposes a new paradigm and a computational framework for revealing equivalencies (analogies) between sub-structures of distinct composite systems that are initially represented by unstructured data sets. For this purpose, we introduce and investigate a variant of traditional data clustering, termed *coupled clustering*, which outputs a configuration of corresponding subsets of two such representative sets. We apply our method to synthetic as well as textual data. Its achievement ...

15 New life in dusty decks: results of porting a CM Fortran based aeroacoustic model to high performance Fortran

Jeffrey J. Nucciarone, Yusuf Özyörük, Lyle N. Long
November 1997 **Proceedings of the 1997 ACM/IEEE conference on Supercomputing (CDROM)**
Publisher: ACM Press
Full text available: pdf(110.48 KB) Additional Information: full citation, abstract, references

The High Performance Fortran language is a 'standard by consensus', developed by individuals and vendors in the high performance computing industry, to provide a low barrier entry to parallel computing. It promises to be an easier to use development environment for distributed memory computing platforms compared to the programming complexity required by message passing libraries such as PVM and MPI. HPF promises much and is still in its infancy.Since HPF was developed in part based on experience ...

Keywords: Thinking Machines CM Fortran, aeroacoustics, dusty decks, high performance Fortran

16 An integrated reading and editing environment for scholarly research on literary works and their handwritten sources

E. Lecolinet, L. Likforman-Sulem, L. Robert, F. Role, J-L. Lebrave
May 1998 **Proceedings of the third ACM conference on Digital libraries**
Publisher: ACM Press
Full text available: pdf(1.09 MB) Additional Information: full citation, references, citings, index terms

17 Long papers: visualization and presentation: The centrality of pivotal points in the evolution of scientific networks

Chaomei Chen
January 2005 **Proceedings of the 10th international conference on Intelligent user interfaces**
Publisher: ACM Press
Full text available: pdf(732.87 KB) Additional Information: full citation, abstract, references, index terms

In this paper, we describe the development of CiteSpace as an integrated environment for identifying and tracking thematic trends in scientific literature. The goal is to simplify the process of finding not only highly cited clusters of scientific articles, but also pivotal points and trails that are likely to characterize fundamental transitions of a knowledge domain as a whole. The trails of an advancing research field are captured through a sequence of

snapshots of its intellectual structure ...

Keywords: betweenness centrality, information visualization, intellectual turning points, knowledge domain visualization, research fronts

18 Editorial: special issue on web content mining

Bing Liu, Kevin Chen-Chuan-Chang
December 2004 **ACM SIGKDD Explorations Newsletter**, Volume 6 Issue 2
Publisher: ACM Press
Full text available: pdf(178.32 KB) Additional Information: full citation, abstract, references

With the phenomenal growth of the Web, there is an everincreasing volume of data and information published in numerous Web pages. The research in Web mining aims to develop new techniques to effectively extract and mine useful knowledge or information from these Web pages [8]. Due to the heterogeneity and lack of structure of Web data, automated discovery of targeted or unexpected knowledge/information is a challenging task. It calls for novel methods that draw from a wide range of fields spanni ...

19 Basic concepts for an HDL reverse engineering tool-set

Gunther Lehmann, Bernhard Wunder, Klaus D. Müller-Glaser
January 1997 **Proceedings of the 1996 IEEE/ACM international conference on Computer-aided design**
Publisher: IEEE Computer Society
Full text available: pdf(298.21 KB) Publisher Site Additional Information: full citation, abstract, references, index terms

Designer's productivity has become the key-factor of the development of electronic systems. An increasing application of design data reuse is widely recognized as a promising technique to master future design complexities. Since the intellectual property of a design is more and more kept in software-like hardware description languages (HDL), successful reuse depends on the availability of suitable HDL reverse engineering tools. This paper introduces new concepts for an integrated HDL reverse eng ...

Keywords: VHDL Verilog Hardware Description Reuse Reverse Engineering Hypertext CASE Visualization Productivity Design Process Analysis Control Flow ADA Graphical Symbol

20 Applications I: The story picturing engine: finding elite images to illustrate a story using mutual reinforcement

Dhiraj Joshi, James Z. Wang, Jia Li
October 2004 **Proceedings of the 6th ACM SIGMM international workshop on Multimedia information retrieval**
Publisher: ACM Press
Full text available: pdf(2.36 MB) Additional Information: full citation, abstract, references, index terms

In this paper, we present an approach towards automated story picturing based on mutual reinforcement principle. Story picturing refers to the process of illustrating a story with suitable pictures. In our approach, semantic keywords are extracted from the story text and an annotated image database is searched to form an initial picture pool. Thereafter, a novel image ranking scheme automatically determines the importance of each image. Both lexical annotations and visual content of an image ...

Keywords: Markov chain, image retrieval, lexical referencing, mutual reinforcement, story picturing
